

Kivnon partners with TAP for AGV/AMR Distribution

Kivnon, a leading global producer of autonomous mobile robots (AMRs) and automated guided vehicles (AGVs), has announced that TAP, a leading global industrial solutions provider, will be distributing Kivnon products throughout Europe.

Kivnon designs, manufactures and implements automated guided vehicles (AGVs/AMRs) for a wide range of global markets, including automotive, food, aerospace, and retail applications. Its products include small AGVs for use in labs; mouse AGV platforms that slide under and lift pallets; tractor AGVs that pull carts; and self-driving forklifts. Kivnon has partnered with TAP to leverage heightened AGV/AMR interest resulting from Industry 4.0 driven digital transformation in Europe.

"This partnership marks a significant milestone for both of our companies. Thanks to TAP's extensive reach and automation expertise, we can supply autonomous vehicles to a larger audience with full confidence that TAP will implement them to take full advantage of their automation potential," said Kivnon's France Country Manager, Jose Pantaleao.

TAP Group teams up with companies across a broad spectrum of industrial segments with unique equipment solutions. The brand "Storagis" is dedicated to storage projects, solutions and equipment in particular for automotive and logistic sector with a European scope.

Damien Marie, Sales Director of TAP Group, is proud to deal with KIVNON, one of the leader of innovative and technological systems: *This is a real opportunity to optimize our clients' supply chain. To reduce cost, increase productivity and safety, many of our clients projects involve advanced automation of material handling and warehousing operations. That usually means deploying one or more AGVs or AMRs.*

About Kivnon

Kivnon is an international company dedicated to mobile robotics with its head office in Barcelona (Spain). Since its initial founding as a family-owned business in 2009, it has been offering customers innovative, highly technological solutions for the implementation of automated guided vehicle (AGVs/AMRs) systems. Its global expertise in mobile robotics include designing, prototyping manufacturing of AGVs/AMRs, installation and launch, technical assistance and customer service. Kivnon exports to more than 17 countries around the world, and continues to extend through subsidiaries in Europe, North America, and South America. For more information, contact:

About TAP Group:

For the past 21 years, TAP Group has mastered the entire B-to-B equipment value chain, from the manufacturing to distribution. The core of its business is **storage solutions withing the brand Storagis**, and industrial packings. It also performs to optimize the business of its clients across Europe with standard ou tailored equipments, waste collection equipments, nuclear equipments, retail furnishings. Key figures: 77 m€ of turnover / 369 employees. www.tap-groupe.com
